MVP App Feature Set (Phase 3/4)

Target Platform – iPhone / Android
User Creation Feature
This will setup the User and Authenticate / Validate and collect the Membership fees. This will sync the user to their Certification and provide them with the Home Screen for voting and Control Panel to update their info.

Voting Feature
This will provide Voting Queue (The Home Screen) for users to manage their voting needs and allow them to vote. The users will be able to pick standard questions to submit (Event or Legislation). The user will be able create Votes that will need approval to be staged for other members.

Rewards Feature
This will provide the Selection for Members / Influencers to determine who will get their membership funds. It will have a method to setup your selections. It will also allow you to submit new members for rewards. Submissions then are Voted on by Region. The App will provide a method to see financial results.

Organizational Feature
Create and announce the current Drumbeat steps for Meetings & Meetups. There will also be a method to create a vote of confidence for Members/ Politicians/ Journalists/ Socials along with Results / History.
