FD2 Will Provide an API for Partners to user to confirm the existance of a Certified User and to ensure there is a link for payment for that user.

API Method
FD2.certified(Certification Number, 4 Digit Key, User Login ID on FD2, Level, Partner Federalist2.eth ID)

Parameters

Certificaiton Number
The number that was provided when the user completed the certifcation Test

4 Digit Key
The 4 Digit key that was provdied as the secret key for the User

User ID on FD2
This is the user login ID on Federalist 2.0

Level
This is the level of Certification the user claims to have.

Partner Federalist2.eth ID
The Partner ID given to the Partner by Federalist 2.0 that is a Federalis2.eth ID. This will allow automated payments be given to the Partner based on the Membership Status of the User.

Return
String (0 or Federalist2.eth ID of the User) - Zero is Failure and Federalist2.eth ID of the User is Success
NOTE: Providing the Federalist2.eth ID will allow the Partner to Capture the Unique ID of the User for their system, and allow for an end of month reconciliation around payment transactions.

Exceptions
Failure is returned when the following occurs:
1) No Certiciation Number Matches
2) 4 Digit Key does not match the expected key for the Certification Number
3) Certificaiton Number and Related FD2 Login ID do not match
4) Certfication Number and Level do not match

These Error codes will be logged on the FD2 Database to be used by Admin to determine next steps.

© 2022 Federalist2.org

FD2 Will Provide an API for Partners query for the level of a Federalist 2.0 User.

API Method
FD2.level(User Federalist2.eth ID)

Parameters

User Federalist2.eth ID
This is the Federalist2.eth ID of the User on the Federalist 2.0 (FD2) system, this is the user's unique number.

Return
String (0 or Level) - Zero is Failure and Level the User's level on the Federalist 2.0 Certification (Currently 1 to 6)
NOTE: Providing the Federalist2.eth ID will allow the Partner determine what level the user is at to help know how to filter their content.

Exceptions
Failure is returned when the following occurs:
1) No Federalist2.eth User Exists

Use Case:
This allows the Partner to determine if the User is a ligitimate Certifciaton Holder over time. If or when a users has updated their level, the new level will be communicated at that time. If for some reason the User Opts out of the Certification Program their return value will be Zero.
